

Vrac de scripts Powershell

Cette petite fiche regroupe en vrac plusieurs scripts Powershell utile.

Sauvegarde d'une BDD d'un serveur SQL Express

snippet.powershell

```
$dt = Get-Date -Format ddMMyyyyHHmmss
$dbname = 'orchard'
$username = 'orchard'
$dir = 'B:\BDD'
$bakfile = "$dir\orchard_$( $dt ).bak"
$limit = (Get-Date).AddMinutes(-30)
$Extension = "*.bak"

Get-ChildItem -Path $dir -Filter $Extension -Force | Where-Object
{ $_.CreationTime -lt $limit } | Remove-Item

Write-Output "backup database to disk file = $bakfile"

Backup-SqlDatabase -ServerInstance VADE-AD1\SQLExpress -Database
$dbname -BackupFile $bakfile
```
